Auto update new version of Notifier

At startup time and sign in, the Notifier checks if there is a new Notifier available on the Linkscope server. If yes, Notifier displays notification message and auto downloads the installation package, executes the installer in a separate process.
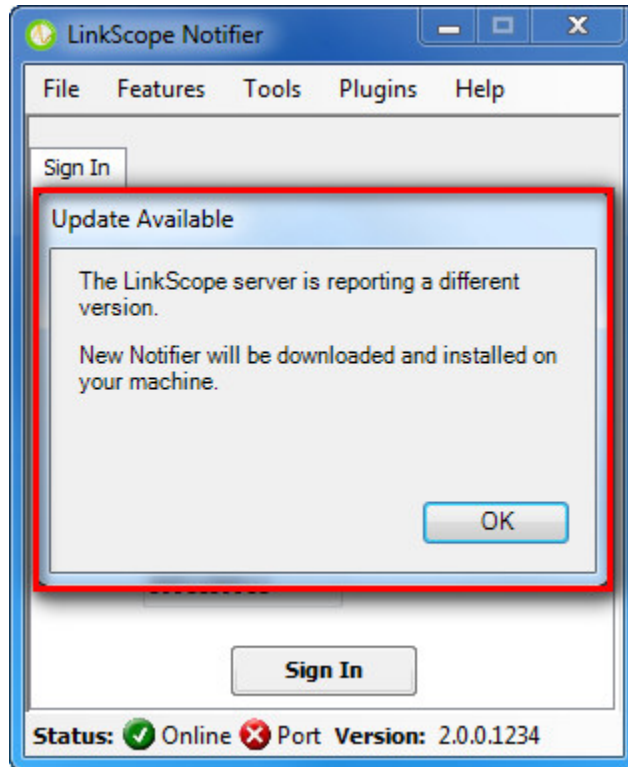

Besides, when agents are working with Notifier, the new Notifier is also checked in real time.

## Step-by-step guide

When the Linkscope server has a new Notifier:

1. The notification message is displayed at agents's desktop
   At startup time or sign in:

   Or when agents are working with Notifier:

2. Click **OK.** Notifier will auto downloads and executes the installer.
